### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Patrick Stiennon on December 1, 2005.

The application has been amended as follows:

#### IN THE ABSTRACT:

A new abstract is provided on the separate, attached page.

#### IN THE CLAIMS:

Claim 1 is canceled.

Claim 3, line 1, "claim 1" is deleted, and - claim 4 - is inserted in its place.

Claim 4, line 26, after "orifices linking a", -- recirculation-- is inserted.

Claim 4, last line, "a" is deleted, and - the -- is inserted in its place.

Claim 8, line 1, "claim 1" is deleted, and - claim 4 - is inserted in its place.

Claim 10, line 23, after "the paper web", -- with the film of coating - is inserted.

Claim 10, line 25, after "the paper web", -- with the film of coating - is inserted.

W/B. Claim 10, line 26, ~~after~~ "the" (first occurrence) is deleted.

Claim 10, line 31, after "chamber", -- through the plurality of flow-metering orifices -- is inserted.

Claim 10, line 32, after "chamber", -- through the plurality of parallel holes -- is inserted.

Claim 12 is canceled.

2. The new abstract provides for an abstract in the case. Claim 1 is canceled due to an issue of new matter as to the flexible blade being "substantially tangent to the backing roll". Claims 3 and 8 are amended to make dependent from pending claim 4 rather than canceled claim 1. Claim 4 is amended to clarify that the same recirculation channel is referred to at lines 26 and the last line. Claim 10 is clarified at lines 23 and 25 to indicate that a film of coating is used, corresponding to the wording of claim 11. Claim 10 is amended at line 26 to clarify that not all coating flows into the recirculation chamber, some is applied as coating. Claim 10, lines 31 and 32 is amended to clarify where the acute angle is formed. Claim 12 is canceled due to an issue of new matter as to the flexible blade used "to form the baffle".

3. The above amendment and the amendment of October 24, 2005 put the case in condition for allowance by removing all outstanding rejections from the Office Action of July 26, 2005.

NEW ABSTRACT

-- Method and apparatus for coating a traveling paper web includes a coater head. The coater head includes an inlet for receiving fresh coating material which is introduced into a mixing chamber. A looped flow path is established within the coater head which includes a feed channel extending from the mixing chamber and leading into a coating chamber where one portion of the coating material proceeds in the direction of the rotating backing roll. The aqueous slurry of coating material near the downstream end of the coating chamber enters a recirculation channel from which it is directed through a plurality of flow metering orifices back into the mixing chamber. --
